As per our conversation this morning 13/1/2014 please find a list of the improvements we have made to control the level of sound from our venue.

Downstairs bar:

Soundproof foam in all the windows
Secondary doors on both the front door and side door

Upstairs bar:

Soundproof foam in all the windows

On a night with music eg function etc:

The front door is out of use and the public come in and out of the side door which are both kept closed (apart from people coming and going)

The DPS (Richard) goes to Russell Street and checks the volume of the noise every 20mins, the noise is then accordingly.

We are getting a limiter and looking into double glazing.

Money is one of the main issues as you can appreciate we have spent a lot of money already on the changes we have made and it has made a huge difference in the level of sound that is leaving the building.

These are all the things that we have shown to you on your visit a few weeks ago.

We appreciate your continuing advice in this matter to come to a solution that both parties are happy with.

Richard and Katie Martin
