

ii) Review of existing performance indicators – and proposals for indicators from 1st 2008

Appendix C: New National Indicators and review of existing Performance Indicators

1.0 Introduction

- 1.1 From April 2008 a new set of 198 National Indicators (NIs) will replace the current Best Value Performance Indicators (BVPIs). They will apply to all local services (police, health, local authorities) and be the "*only set of indicators that performance of local services will be assessed against by Central Government*".
- 1.2 The indicators have been developed following the publication of the Government's Comprehensive Spending Review (CSR 07) last autumn. The purpose of NIs is to manage performance against the priorities set out in the review. The 198 NIs represent a significant reduction from the 1,000+ indicators the public sector were previously required to report. This reduction in numbers represents Government's efforts to reduce the central reporting burden in order to allow greater focus on local priorities.
- 1.3 Although a few of the new NIs replace existing BVPIs the new set has a greater focus on outcomes for local residents than on satisfactory service provision. Some of the new indicators will require more coordinated work across the Council or with partners to deliver than was the case for BVPIs.
- 1.4 The Department for Communities and Local Government conducted a six-week consultation on the new indicators before Christmas. The final technical details about calculating 138 of the indicators were published at the end of February; the details for the remaining 60 indicators will be published at the end of March.

2.0 NPIs relevant to Hastings Borough Council

- 2.1 Of the 198 indicators around 60 - 70 relate to the District/Borough Councils (the final number will not be known until the full set is published), and performance on these will be assessed annually. (Please also see 3.5)
- 2.2 The new Local Area Agreements (LAA) will include up to 35 indicators from the new set as well as statutory education indicators from 2008/09 onwards. The new East Sussex LAA is currently being developed and will include the most appropriate indicators for our area in negotiation with the Government Office for the South East (GOSE).

3.0 Review of Existing Indicators

- 3.1 Officers have undertaken a review of our current BVPIs to identify which ones we would want to keep reporting locally, and whether to revise any of our current Local Performance Indicators.
- 3.2 Part III of the Council's Corporate Plan needs to be developed and agreed by 30th June 2008. Part III will contain a report back on performance in 2007/08 and will identify the three-year performance targets for 2008/09 – 2010/11. Therefore it is important to gain O & S views about which indicators should be

kept as local indicators to complement the smaller number of National Performance Indicators.

- 3.3 Once the list of new Local Indicators is finalised, targets will be set, informed by 2007/08 year-end performance, and the final list and targets will be subject to consultation with O & S and approval by Cabinet on 9th June 2008.
- 3.4 Heads of Service's proposals for indicators to keep, change or remove are listed below, identifying reasons for the changes suggested. Where a BVPI is felt to be of use and is indicated to keep, it is proposed to adopt it as a local indicator.
- 3.5 Communities and Local Government Department have produced a list of all indicators for Districts, which is included at the end. This includes some indicators such as mortality levels that they have stated that performance will be judged on at District level. It has not been made clear what the mechanism for judging performance will be, or which organisations will be involved yet, and more information is expected to follow on this.

Community Wellbeing

Significant issues relating to new or existing indicators:

NI 187 Tackling Fuel poverty - the methodology published in the consultation document for this indicator may have cost implications for collection. It will not be clear until the final publication of the indicators by April 2008 exactly what the extent of these implications may be though.

Housing Services

National Indicators (subject to final publication):

NI 12 Refused and deferred Houses in Multiple Occupation (HMO) license applications leading to immigration enforcement activity

NI 155 Number of affordable homes delivered (gross)

NI 156 Number of households living in Temporary Accommodation

NI 187 Tackling fuel poverty – people receiving income based benefits living in homes with a low energy efficiency rating

Existing indicators proposed to keep:

BV202 Number of people sleeping rough

BV213 Homelessness prevented through housing advice casework / 1,000 households

L343 Number of homelessness acceptances (CS target 18a)

L344 Number of households in temporary accommodation (this indicator will be replaced by National Indicator 156, also relates to CS target 18b)

L(BV)183a Length of stay in B&B accommodation (families)

L182 Improve standards in the Private Rented Sector through the Accredited Lettings Scheme

L338 Number of private sector dwellings (units) brought in line with the current statutory standard

Changes:

BV064 Private sector dwellings vacant returned to occupation or demolished as result of Council action

It is proposed to keep this indicator, but reporting only on dwellings returned to use, not demolitions

L183 Attain the Decent Homes Standard for vulnerable people in Central St Leonards - this indicator will be replaced by:

Community Strategy target 17 - Improve housing standards within the most deprived wards to reflect the decent homes standard

Indicators proposed to be dropped:

L016 YTD average length of stay in bed and breakfast accommodation (all placements)

Following the successful reduction in the length placements in bed and breakfast accommodation, the new Government focus is on reducing use of all types of temporary accommodation, as reflected in its new National Indicators. In line with this we intend to drop this indicator, but will still report length of stay of families in B&B accommodation.

L187 Number of licensed Houses in Multiple Occupation

We keep a public record of licensed properties, as required by legislation. From next year this will be removed as a performance indicator though.

L190 Homes with Disabled Facilities Grant (DFG) adaptations

The amount of work we undertake for this area is determined by the level of funding available, and delivery is managed through our budget processes. From next year this will therefore be removed as a performance indicator.

L337 Improve community safety in priority neighbourhoods (Super Output Areas) through the Secure Accommodation Scheme

This indicator related to work commissioned by Neighbourhood Renewal, which has now been achieved. The indicator will therefore be removed from the end of the year.

BV225 Victims of Domestic Violence

This indicator consisted of a checklist of items to improve services in this area, all of which will have been completed by the end of the year. It is therefore proposed that it be removed from then. Incidence of domestic violence is a new National Indicator that will continue to be reported, as listed under Regeneration and Community Services.

Leisure Services

New National Indicators (subject to final publication):

NI 8 Adult participation in sport

Existing indicators proposed to keep:

L233 Number of people attending White Rock Theatre performances

L304 Number of shows at White Rock Theatre

New Indicators

New indicators relating to sports centres are being developed and will be available for next year.

Indicators proposed to drop:

L234 % Average capacity per show at White Rock Theatre

It is proposed to drop this indicator from next year, as the other two indicators are the key indicators for the theatre, and this does not add significant performance information.

Environmental Services

Environmental Health

National Indicators (subject to final publication):

NI 182 Satisfaction of businesses with local authority regulation services

NI 184 Food establishments in the area which are broadly compliant with food hygiene law

Existing indicators proposed to keep:

L115 Number of planned food premises inspections carried out

L116 % of people responded to within 5 working days when making a complaint about food purchased from a shop or catering establishment in the Borough.

L117 % of people responded to within 5 working days when making a complaint about the standards of hygiene at a food premises in the Borough.

L118 Number of planned Health & Safety inspections carried out

L119 % Health and Safety complaints responded to within 5 working days - (% of people responded to within 5 working days when making a complaint about the standards of health and safety in a business premises in the Borough).

L122 % licensing complaints responded to within 5 working days

L123 % nuisance/general public health complaints responded to within 4 working days (bonfires, noise, accumulations etc).

L125 % drainage complaints responded to within 2 working days

L126 % of requests for pest control services responded to within 4 working days.

Existing indicators proposed to drop:

Defra has not included any of the existing Environmental Health BVPIs in its new proposed indicator set. This is in line with the recommendations of the Lifting the Burdens Task Force (set up by the Secretary of State for Communities and Local Government) for their immediate removal due to the changes in principles for best practise in this area since their introduction. It is therefore proposed that the following existing BVPIs for this area be dropped.

BV166a Score against checklist of enforcement best practice for environmental health

BV216a Number of sites of potential concern within the local authority area with respect to land contamination

BV216b Number of sites for which sufficient detailed information is available to decide whether remediation of the land is necessary, as a percentage of all 'sites of potential concern'

BV217 Percentage of pollution control improvements to existing installations completed on time

Waste and Recycling

National Indicators (subject to final publication):

NI 191 Residual household waste per head

NI 192 Household waste recycled and composted

NI 193 Municipal waste land filled

NI 195 Improved street and environmental cleanliness (levels of graffiti, litter, detritus and fly posting)

NI 196 Improved street and environmental cleanliness – fly tipping

BVPIs replaced by New National Indicators:

BV082ai The percentage of the total tonnage of household waste arisings which have been recycled

BV082aia The total tonnage of household waste arisings which have recycled

BV082bi The percentage of the total tonnage of household waste arisings which have been composted (excluding home composting).

BV082bii The tonnage of household waste arisings which have been composted

BV084a Number of kilograms of household waste collected per head

BV084b The percentage change from the previous financial year in the number of kilograms of household waste collected per head of the population

BV199a The proportion of relevant land and highways that is assessed as having combined deposits of litter and detritus that fall below an acceptable level

BV199b The proportion of relevant land and highways from which unacceptable levels of graffiti are visible

BV199c The proportion of relevant land and highways from which unacceptable levels of fly-posting are visible

BV199d the year on year reduction in total number of incidents and increase in total number of enforcement actions taken to deal with 'fly-tipping'

Existing indicators proposed to keep:

L020 The average number of failed bin collections per month (per 100,000 collections)

Indicators proposed to be dropped:

BV086 Cost of waste collection per household

This indicator is not included in the new national set. Without national comparative information this is not of use as a performance indicator, so it is proposed to be dropped.

BV091a Percentage of population resident in the authority's area which are served by kerbside collection of recyclables.

BV091b The percentage of households resident in the authority's areas served by kerbside collection of at least two recyclables

Nearly all of the Borough is now served by kerbside collection of recyclables. In line with the removal of these indicators from the national set we will remove these from 2008/09.

Amenities and Resort Services

National Indicators (subject to final publication):

NI 197 Improved local biodiversity - active management of local sites

Existing indicators:

L003 Annual usage of the East and West Hill Cliff Railways

% of households within 300m of an accessible open space that meets the Council's quality standard (Community Strategy target 20)

Parking and Highways

There are no indicators for this service proposed in the new National set

Existing indicators:

BV218a Percentage of new reports of abandoned vehicles investigated within 24hrs of notification

BV218b Percentage of abandoned vehicles removed within 24 hours from the point at which the authority is legally entitled to remove the vehicle

L138 % Penalty Charge Notices issued in bus corridor routes

L139 % on street Penalty Charge Notices issued for yellow line offences

L142 % Correspondence to Parking Services responded to in full within 10 days

L127 Highway Safety Inspections on time

L128 Highways Planning applications in 14 days

Increase the total number of bus passenger journeys (Community Strategy target 19)

Indicators proposed to be dropped:

L137 % bus corridor routes patrolled daily

All routes are now patrolled every day, so this indicator does not help to manage performance. L138 is a more appropriate indicator of performance and this proposed to be dropped.

L148 Number of crimes reported in Council car parks

Measures put in place have successfully reduced crime levels in car parks. This information is no longer available from the police though, and it is therefore proposed to be dropped.

Regeneration & Planning

Significant issues relating to new or existing indicators:

While some of the changes proposed below are relatively straightforward, and relate only to individual services, other areas may need consideration by wider services or partners. Issues that may need further consideration are indicated here.

Racial Incident Reporting

There were two indicators relating to reporting of Racial Incidents that the Council is responsible for, which are not included in the new national set. With the removal of the requirement to report these, the decision as to what information is most useful for this area for the Council should be informed by discussion at corporate level.

Speed of processing Planning Applications

The changes in grant allocation through the Planning Delivery Grant mean that there will be less resources and flexibility available within this area, which will have an effect on performance. Target performance levels will need to be reviewed in light of this.

Improvements to derelict or run down buildings

The focus for improvements over the next years will be on buildings requiring more input and time to achieve. Work is scheduled for 2008/09 to deliver a significant improvement project at Pelham, with which it should be possible to achieve the current target of 30 during the year. Targets for future years may need to be reduced to reflect the amount of work needed to achieve the improvements, and the resources of the service.

Economic Indicators

The new national indicator set includes a number of economic indicators that will be calculated by national agencies, but performance will be judged at local level. When the final set is published it will be necessary to review the existing economic indicators to ensure best alignment. The existing Community Strategy and national indicators proposed for reporting at District and County level are listed under Regeneration below.

Destination Management and Marketing

BV174 - The number of racial incidents recorded by the authority

BV175 - The percentage of racial incidents that resulted in further action

To be discussed further, as noted above.

Existing indicators proposed to keep:

L239 Number of people visiting Castle

L028 - Number of complaints resulting in case of Maladministration

L027 Number of customers in Information Centres

Change:

BV170a Visits to / usage of museums per 1000 population

BV170b Visits to museums that were in person per 1000 population

The indicators for museums above will be retained as local indicators, but total figures of visits in person and visits to HBC websites will be reported. Without comparative information from other Councils as a BVPI there is no benefit to reporting numbers per 1,000 population.

Additional Indicators proposed:

Because no indicators for tourism have been included in the national indicator set, comparative indicators for use across the industry are currently being developed, and we will report on these at the end of the year.

Indicators proposed to be dropped:

BV170c Pupils visiting museums and galleries in organised school groups

This indicator is not included in the national set. It is proposed that this indicator be dropped in line with Government intention of reducing reporting burdens.

Planning Services

National Indicators (subject to final publication):

NI 154 Net additional homes provided

NI 157 Processing of planning applications as measured against targets for 'major', 'minor' and 'other' application types

NI 159 Supply of ready to develop housing sites

NI 170 Previously developed land that has been vacant or derelict for more than 5 years

Existing indicators proposed to keep:

L166 % Site visits made on same day requested by Building Control

BV109a % Planning applications in government target - major

BV109b % Planning applications in government target - minor

BV109c % Planning applications in government targets - other

(BV109 parts a-c are replaced by National Indicator 157)

BV204 - Percentage of appeals allowed against the authority's decision to refuse planning applications

L160 Derelict / run down buildings improved

BV106 % New homes built on previously developed land (relates to

Community Strategy target 16b)

L159 Net number of new homes built (relates to Community Strategy target 16a) - (this indicator will be replaced by National Indicator 154)

L341 % of all land searches carried in 10 days excluding personal searches -

change: For 2008/09 it is proposed to change this to measuring the percentage of searches carried out in 7 days.

Indicators proposed to be dropped:

L162 % Full Plans receiving 14 day response from Building Control

L165 % ongoing work inspected within 3 months by Building Control

These indicators are most relevant to internal management of the service, and it is proposed that they should be monitored through internal management processes in future. The main public response indicator for the service, L166 is proposed to be maintained.

BV200a Did the local planning authority submit the Local Development Scheme (LDS) by 28th March 2005 and thereafter maintain a 3-year rolling programme?

BV200b Has the local planning authority met the milestones, which the current Local Development Scheme (LDS) sets out?

The new Housing and Planning Delivery Grant includes requirements to report on delivery of Development Plan documents. As performance will be managed via that route it is proposed that these indicators are removed.

BV205 - Quality of service checklist

All of the items required for this indicator have been completed so it will no longer be reported.

BV219b Percentage of conservation areas in the local authority area with an up to date character appraisal

This indicator is not included in the national set. It is proposed that this indicator be dropped in line with Government intention of reducing reporting burdens.

Projects

There are no National or Community Strategy Indicators for this service

Regeneration and Community Services

Economic, Community Services and Community Safety Indicators are dealt with separately below.

Economic Indicators

National Indicators:

Economic indicators proposed for reporting at District and County level in consultation (note, this could change in the final published set) with organisations responsible for reporting the data.

NIs for District reporting level:

- NI 118 Take up of formal childcare by low-income working families (HM Revenues and Customs)
- NI 151 Overall employment rate (Office of National Statistics (ONS))
- NI 152 Working age people on out of work benefits (Jobcentre Plus (J+))
- NI 171 VAT registration rate (ONS)
- NI 172 VAT registered businesses in the area showing growth (ONS)
- NI 173 People falling out of work and on to incapacity benefits (Department of Work and Pensions (DWP))

NIs for County reporting level:

- NI 116 Proportion of children in poverty (DWP)
- NI 117 16 to 18 year olds who are not in education, training or employment (NEET)
- NI 153 Working age people claiming out of work benefits in the worst performing neighbourhoods (J+)
- NI 166 Average earnings of employees in the area (ONS)

Community Services

Community Services is involved in partnership working and commissions activities to address a range of issues across the town. The key Community Strategy targets reflected by this work are:

- 1 Narrow the gap - halve the number of neighbourhoods in the 10% most deprived nationally. (A neighbourhood is defined as a Super Output Area).
- 2 Increase the % of local people satisfied with their neighbourhood as a place to live.
- 10 Increase the number of residents who feel people from different backgrounds live harmoniously in the town.
- 12 Increase the % of people surveyed who feel they can influence decisions affecting their local area.

Changes in these outcomes rely on the work of several services and agencies, but they are reported here because of the partnership coordination and commissioning roles of Community Services.

Existing Indicators proposed to be dropped:

BV226a Total amount spent by the local authority on advice and guidance services provided by external organisations

This indicator is not included in the new national set. Without national comparative information this is not of use as a performance indicator, so it is proposed to be dropped.

BV226b Percentage of monies spent on advice and guidance services provision that was given to organisations holding the Community Legal Services Quality Mark at 'General Help' level and above

This indicator is not included in the new national set. All funding relevant to this indicator has always been to organisations holding the Quality Mark, so this is not of use to us as a performance indicator and it is proposed to be dropped.

BV226c Total amount spent on Advice and Guidance in the areas of housing, welfare benefits and consumer matters which is provided directly by the authority to the public

This indicator is not included in the new national set. Without national comparative information this is not of use as a performance indicator, so it is proposed to be dropped.

Community Safety

New National Indicators (subject to final publication):

(note these do not include perception indicators from the Place survey)

NI 15 Serious violent crime rate

NI 16 Serious acquisitive crime rate

NI 20 Assault with injury crime rate

NI 24 Satisfaction with the way the police and local council dealt with anti-social behaviour

NI 25 Satisfaction of different groups with the way the police and local council dealt with anti-social behaviour

NI 28 Serious knife crime rate

NI 29 Gun crime rate

NI 30 Re-offending rate of prolific and priority offenders

NI 32 Repeat incidents of domestic violence

NI 34 Domestic violence - murder

Existing Indicators proposed to keep:

Community Strategy Indicators

5 Halve the gap between overall crime rates per 1000 for Hastings and St Leonards and the average for England and Wales.

6 Increase the % of residents who feel safe walking alone in their local neighbourhood at night.

BVPIs to be amended / adopted:

The following indicators will be adopted as local indicators due to relevance, but reporting actual crime numbers instead of rates for clarity:

BV126a Domestic Burglaries per 1000 households

BV128a Vehicle Crimes per 1000 population

Indicators proposed to be dropped:

It is proposed that the following indicators are dropped as these types of crimes are sufficiently covered in the new national indicators:

BV127a Violent Crime per 1,000 population

BV127b Robberies per 1,000 population

CLG list of indicators for Districts

| NI No | Definition of indicator |
|--------|---|
| NI 1 | % of people who believe people from different backgrounds get on well together in their local area |
| NI 2 | % of people who feel that they belong to their neighbourhood |
| NI 3 | Civic participation in the local area |
| NI 4 | % of people who feel they can influence decisions in their locality |
| NI 5 | Overall / general satisfaction with local area |
| NI 6 | Participation in regular volunteering |
| NI 8 | Adult participation in sport |
| NI 10* | Visits to museums or galleries |
| NI 14 | Avoidable contact: The average number of customer contacts per resolved request |
| NI 15 | Serious violent crime |
| NI 16 | Serious acquisitive crime |
| NI 17 | Perceptions of anti-social behaviour |
| NI 20 | Assault with injury crime rate |
| NI 21 | Dealing with local concerns about anti-social behaviour and crime by the local council and police |
| NI 22 | Perceptions of parents taking responsibility for the behaviour of their children in the area |
| NI 23 | Perceptions that people in the area treat one another with respect and consideration |
| NI 27 | Understanding of local concerns about anti-social behaviour and crime by the local council and police |
| NI 29 | Gun crime rate |
| NI 30 | Re-offending rate of prolific and priority offenders |
| NI 32 | Repeat incidents of domestic violence |
| NI 34 | Domestic violence - murder |
| NI 35* | Building resilience to violent extremism |
| NI 36 | Protection against terrorist attack |
| NI 37 | Awareness of civil protection arrangements in the local area |
| NI 41 | Perceptions of drunk or rowdy behaviour as a problem |
| NI 42 | Perceptions of drug use or drug dealing as a problem |
| NI 118 | Take up of formal childcare by low-income working families |
| NI 119 | Self-reported measure of people's overall health and wellbeing |
| NI 120 | All-age all cause mortality rate |
| NI 121 | Mortality rate from all circulatory diseases at ages under 75 |
| NI 122 | Mortality from all cancers at ages under 75 |
| NI 137 | Healthy life expectancy at age 65 |
| NI 138 | Satisfaction of people over 65 with both home and neighbourhood |
| NI 139 | The extent to which older people receive the support they need to live independently at home |
| NI 140 | Fair treatment by local services |
| NI 151 | Overall employment rate |
| NI 152 | Working age people on out of work benefits |
| NI 154 | Net additional homes provided |
| NI 155 | Number of affordable homes delivered (gross) |
| NI 156 | Number of households living in Temporary Accommodation |

| | |
|--------|--|
| NI 157 | Processing of planning applications as measured against targets for 'major', 'minor' and 'other' application types |
| NI 158 | % decent council homes |
| NI 159 | Supply of ready to develop housing sites |
| NI 160 | Local authority tenants' satisfaction with landlord services |
| NI 170 | Previously developed land that has been vacant or derelict for more than 5 years |
| NI 172 | VAT registered businesses in the area showing growth |
| NI 173 | People falling out of work and on to incapacity benefits |
| NI 179 | Value for money - total net value of ongoing cash-releasing value for money gains that have impacted since the start of the 2008-09 financial year |
| NI 180 | Changes in Housing Benefit/ Council Tax Benefit entitlements within the year |
| NI 181 | Time taken to process Housing Benefit/Council Tax Benefit new claims and change events |
| NI 182 | Satisfaction of businesses with local authority regulation services |
| NI 184 | Food establishments in the area which are broadly compliant with food hygiene law |
| NI 185 | CO2 reduction from Local Authority operations |
| NI 186 | Per capita reduction in CO2 emissions in the LA area |
| NI 187 | Tackling fuel poverty - people receiving income based benefits living in homes with a low energy efficiency rating |
| NI 188 | Adapting to climate change |
| NI 189 | Flood and coastal erosion risk management |
| NI 191 | Residual household waste per head |
| NI 192 | Household waste recycled and composted |
| NI 193 | Municipal waste landfilled |
| NI 194 | Level of air quality - reduction in NOx and primary PM10 emissions through local authority's estate and operations |
| NI 195 | Improved street and environmental cleanliness (levels of graffiti, litter, detritus and fly posting) |
| NI 196 | Improved street and environmental cleanliness - fly tipping |
| NI 197 | Improved local biodiversity – active management of local sites |

Please note that this is not a complete list of the new indicators – others such as indicators from a new survey that will replace the BVPI satisfaction survey are still the subject of consultation.
