Affordability prudential indicator - Ratio of financing costs to net revenue stream

This indicator assesses the affordability of the capital investment plans. It provides an indication of the impact of the capital investment plans on the Council's overall finances. This indicator identifies the trend in the cost of capital (borrowing and other long term obligation costs net of investment income) against the net revenue stream.

Prudential Indicator: Financing Cost to Net Revenue Stream	2017/18 Actual	2018/19 Rev.Est	2019/20 Estimate	2020/21 Estimate	2021/22 Estimate
Financing Costs	£'000	£'000	£'000	£'000	£'000
1. Interest Charged to General Fund	925	1,366	1,983	2,296	2,394

Total	1,318	1,795	2,614	3,090	3,107
Net Revenue Stream					
Amount to be met from government grants and local taxpayers	13,373	13,034	13,034	13,389	13,673
Ratio					
Financing Cost to Net Revenue Stream	10%	14%	20%	23%	23%

This prudential indicator shows that the ratio of financing costs to the net revenue stream is increasing. This is not unexpected given that the Council has an income generation strategy that has identified an additional £50m of Capital expenditure over the period 2017/18 to 2020/21. The above ratio does not take into account the income that will be generated from the energy initiatives and commercial property acquisitions.

Other Prudential Indicators

Internal Borrowing and Gearing ratios for the authority are included in the Capital Strategy. Additional prudential indicators will be developed as the forward capital plans of the authority are developed.
