	,	
	If there is likely to be a significant underspend compared to	LAD 2 was modelled differently from the other rounds of funding
	the allocation and if so what factors do you consider account	with the East Sussex area funded up to £2 million with
	for this?	approximately £300K for Hastings Borough Council. This money
		was given to the Greater South East Energy Hub to administer.
		The Managing Agent initially appointed by them was Happy
		Energy. Hastings Borough Council officers working across fuel
		poverty and minimum energy efficiency standards (MEES) met
		with Happy Energy to identify, identification and referral pathways,
		particularly landlords and the private rented sector in the town.
		However, Happy Energy were not able to deliver within the constraints of LAD2 and withdrew as managing agent for East
		Sussex and beyond. This was mirrored in other areas, with E'ON
		also withdrawing as the managing agent from West Sussex.
		also maisiawing do the managing agent from Woot Gassex.
		Recently, Warmworks were appointed as the replacement
		managing agent for LAD2, and finally, an extension was granted
		by BEIS with the delivery timescale of December 2021 moved to
		31st March 2022. There are some concerns that Warmworks may
		also struggle to deliver the LAD2 project.
		East Sussex Consortium partners, particularly the Hastings

Borough Council resource, has focused on successfully delivering LAD1A, LAD1B, LAD3 and HUG 1.

Local Authorities who did issue communications on behalf of Happy Energy have since received some complaints from residents that did not receive the promised work. Hastings Borough Council made the decision not to issue any communications for Happy Energy in relation to LAD2. We did agree that we would do a direct identification and referral to Happy Energy via the MEES project for any eligible households. However after our initial meeting with them we never heard from them again and later they withdrew as the managing agent.

It was felt by Hastings Borough Council and other East Sussex Local Authorities that the simultaneous communications for both the delivery of the East Sussex Consortium programme and the contradictory model for LAD2 had potential to confuse residents and reduce clarity and faith in the primary East Sussex model resulting in the contracted delivery targets of the Consortium Programme not being met. Concerns were also raised for the long-term impact on resident clarity and faith in energy efficiency schemes – an identified barrier to successful retrofit programmes.

Throughout the LAD2 process, significant officer resource has been dedicated to finding a way for Hastings Borough Council residents to benefit from the LAD2 funding in such a way as to support them and compliment the delivery models we had already committed to.

As far as we are aware no works have been carried out in the Hastings Borough area under LAD2, and we have received no complaints of promised but undelivered works. Therefore, it is anticipated that a potential £300K has not been spent under LAD2; however, due to the factors explained above it is not thought that the funding will be successfully delivered.
